Art Unit: 3731

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, 8, 11-14 and 16, drawn to a balloon for a balloon dilation catheter, classified in class 606, subclass 194.
- II. Claims 19-22, drawn to a method of manufacturing a balloon catheter, classified in class 264, subclass 156.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus as claimed can be used to practice another and materially different process. For example, waist with the voids defined in claim 1 could be attached to a catheter shaft by adhesive and without thermally reforming the waist.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by

Art Unit: 3731

their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
